SFL Companies Named to *Food Logistics*' 2019 FL100+ Top Software and Technology Providers

Rochester, Michigan – December 17, 2019 – SFL Companies, a full-service supply chain management and logistics firm focused on technology driven freight management, was named **Top Software and Technology Provider 2019** by *Food Logistics*, the only publication exclusively dedicated to covering the movement of product through the global food supply chain.

The annual **FL100+ Top Software and Technology Providers** serves as a resource guide of software and technology providers whose products and services are critical for companies in the global food and beverage supply chain.

“Whether you’re using sensors to monitor critical temperatures for perishables or a WMS to manage inventory flows in your warehouse, software and technology are playing a vital role in the food and beverage industry,” remarks John R. Yuva, editor for *Food Logistics* and its sister publication, *Supply & Demand Chain Executive*. “The transparency and safety of the digital global food supply chain would not exist without innovations in software and technology. Our FL100+ recipients help drive supply chain compliance and regulatory changes that benefit everyone from the farmer to the food processor to the consumer.”

This year’s **Top Software and Technology Providers** list will appear in the November/December 2019 issue of *Food Logistics*, as well as online at www.foodlogistics.com.
